WORK EXPERIENCE

Warewe Consultancy Gurugram, India
Full Stack Developer Intern June 2025 – July 2025

● Contributed to end-to-end development of scalable web applications by implementing RESTful APIs, optimizing database queries, and enhancing UI/UX components, while collaborating in an agile environment to deliver high-quality, production ready solutions.

Zidio Development Remote
Full Stack Developer Intern May 2025 – June 2025

● Built REST APIs using Node.js and Express for authentication and data management.
● Optimized MongoDB queries reducing API latency by 40%.
● Implemented JWT authentication and protected API routes.

PROJECTS

HackTrack – AI-Powered Hackathon Platform
Live: https://hacktrack1-mu.vercel.app/
GitHub: Repository

Tech Stack: React, Node.js, Express, MongoDB, JWT, Hugging Face, Sentence-BERT, Vector Embeddings, Vercel, Render

- Built an AI-powered platform to discover hackathons and match developers using semantic embeddings and intent-based search.
- Implemented semantic teammate search using Sentence-BERT embeddings and cosine similarity, enabling intent-based matching beyond keyword search.
- Developed an AI-driven recommendation engine combining semantic similarity, skill complementarity, role balance, and domain alignment.
- Built an automatic team formation algorithm ensuring diverse roles, balanced skills, and time compatibility across teams.
- Aggregated hackathon data from Devpost, MLH, Clist and user submissions with deduplication, caching and secure JWT-based authentication

DocuQuery – AI-Powered Team Document Intelligence Platform
Live: Demo | **GitHub:** Repository
Tech Stack: Next.js 14, FastAPI, PostgreSQL (Supabase), Cohere AI, TypeScript, Python, pgvector, Vercel, Render

- Built a production-grade, multi-tenant SaaS platform enabling teams to collaboratively upload, organize, and query documents using natural language through Retrieval-Augmented Generation (RAG).
- Designed a scalable multi-workspace architecture with Row Level Security (RLS) ensuring complete data isolation between teams while sharing a unified database infrastructure. Implemented JWT-based authentication with role-based access control (Owner/Admin/Member).
- Developed a complete RAG pipeline processing PDF, DOCX, TXT, and MD files: text extraction via PyPDF2/python-docx, semantic chunking with 1000-char overlap, 1024-dimensional Cohere embeddings, and pgvector storage with IVFFlat indexing for sub-100ms

KidneyScan AI – Medical Imaging Classification with MLOps
Live: https://kidney-image-classification.streamlit.app/
GitHub: Repository

Tech Stack: Python, TensorFlow, CNNs, DVC, MLflow, Streamlit

- Built a deep learning system to classify kidney CT scans as Normal or Tumor using convolutional neural networks.
- Implemented MLOps practices using DVC for dataset versioning and MLflow for experiment tracking and model logging.
- Integrated confidence-based prediction logic to prevent overconfident outputs and enforce human review for low-confidence cases.
- Deployed a Streamlit web application with confidence-based predictions and safeguards for low-confidence outputs.

AI Resume Analyzer– NLP-Based Resume Intelligence Platform
Live: https://dl-projects-resume-analyzer.streamlit.app/
GitHub: Repository

Tech Stack: Python, Streamlit, spaCy, NLTK, Sentence Transformers, NLP, Plotly

- Built an NLP-based system to evaluate resumes and match them with job descriptions using semantic embeddings.
- Implemented resume parsing with rule-based extraction, NER and transformer embeddings for skill and experience analysis.
- Developed ATS compatibility scoring based on keyword relevance, resume structure and quantified achievements.
- Created an interactive dashboard with visual skill breakdowns, recommendations and career insights.

SKILLS

Programming Languages: Python, JavaScript, C++, C, SQL
Web, Backend & API Engineering: FastAPI, Flask, RESTful APIs, Webhooks, MERN Stack (MongoDB, Express, React, Node), Streamlit, JWT Authentication, Microservices Architecture
Machine Learning & Deep Learning: scikit-learn, TensorFlow, Keras, PyTorch, NumPy, pandas, Model Training, Feature Engineering, Hyperparameter Tuning, Model Evaluation, Experiment Tracking
Neural Networks & AI Concepts: ANNs, CNNs, Transformers, Attention Mechanisms, Transfer Learning, Fine-Tuning, Regularization, Loss Functions, Optimizers, Backpropagation
Generative AI & LLM Engineering: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, Agentic Workflows, Embeddings, Semantic Search, Tool Calling, Function Calling
Hugging Face, LangChain, LlamaIndex, OpenAI-compatible APIs
MLOps & ML Systems: DVC, MLflow, Model Versioning, Data Pipelines, Reproducible ML Workflows
Databases & Data Engineering: MongoDB, MongoDB Atlas, PostgreSQL, Vector Databases (FAISS / embedding-based search), ETL Pipelines, Data Modeling
Automation & AI Workflows: n8n, Workflow Automation, Event-Driven Pipelines, Human-in-the-Loop Systems, Email & Business Process Automation
Cloud, Deployment & DevOps: Docker, GitHub Actions (CI/CD), Linux, API Deployment, Vercel, Render, Streamlit Cloud
Core Computer Science Foundations: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Machine Learning

EDUCATION

Thapar Institute of Engineering and Technology — Patiala, Punjab
Bachelor of Technology — Expected May 2027
Major in Computer Engineering
Cumulative GPA: 7.8

Indian Institute of Technology (IIT) Patna — Patna, Bihar
Minor in Generative AI & Machine Learning — Expected 2026

Shishu Niketan Model Senior Secondary School (Class XII) — Chandigarh, Punjab
Grade : 92% — 2023

Manav Mangal School , Panchkula (Class X) — Panchkula, Haryana
Grade : 94% — 2021
